Instructions

Serve the food gradually during the transition from the pet's previous food, straight from the bag or rehydrated according to the rationing table printed on the bag. Provide plenty of drinking water. The opinion of a nutrition expert or veterinarian should be sought before using the food or before extending its period of use. To obtain the best results, ensure that the recommended daily quantities are complied with and do not give the animal any other food (treats, leftovers, etc.). Make sure your dog exercises. The loss of excess weight takes several weeks or even several months. We suggest weighing your pet each week to monitor any changes in weight. Recommended length of time: Until target body weight is achieved.
