Instructions

Serve the food gradually during the transition from the pet's previous food, straight from the bag or rehydrated according to the rationing table printed on the bag. Daily amounts need to be adjusted according to the animal's breed, weight and activity. Provide plenty of drinking water. The opinion of a nutrition expert or veterinarian should be sought before using the food or before extending its period of use. To obtain the best results, ensure that the recommended daily quantities are complied with and do not give the animal any other food. Recommended length of time: up to 6 months.

Optimal weight of cat	2 kg	3 kg	4 kg	5 kg	6 kg
Daily quantity	30 g	45 g	60 g	75 g	90 g
Average duration in days for bag of 2 kg	67	44	33	27	22
Average duration in days for bag of 400 g	13	9	7	5	4

Storage precautions: to preserve the food's qualities, store in a cool, dark and dry place.

30 % of the whole of dehydrated animal proteins contained in the food correspond to 56 % in fresh equivalent. The fresh equivalent consists of the rehydration of the dehydrated animal products knowing that they contain to the maximum 6 % of water whereas the fresh animal products have 75 % of it.
