EXCELLENCE & PLEASURE

KITTEN

Complete food for kittens and female cats at the end of gestation and during lactation.

Bags of 400 g  
and 2 kg

## ENHANCED IMMUNITY

(beta-glucans)

Beta-glucans extracted from *Saccharomyces cerevisiae* yeasts and combined with fructooligosaccharides support a strong immune system.

## DIGESTIVE SAFETY

The combination of probiotics (*Enterococcus faecium*) and prebiotics (FOS and MOS) promotes the development of good intestinal flora. Highly digestible ingredients and clay help to ensure transit until your kitten's digestive system becomes fully developed.

## CONTROLLED URINE PH

The mineral balance and its reduced level limit kidney's overloading and help to provide an optimal urine pH to limit risks of urinary calculus.
